SAVANT

OrderSavant Distribution Solution

Have you invested years in building the heart of your organization? Can you really afford to replace your investment with a solution that may or may not improve your situation? Would you like your business system to give you a competitive edge but are afraid to replace years of infrastructure and stability. The solution is OrderSavant.

OrderSavant is a powerful and integrated order processing system that interfaces with existing business systems. Ideal for inside, outside, counter sales, as well as managers, OrderSavant has been optimized to increase margins, boost sales, and improve efficiency. We designed the product around the quoting and ordering process rather than adapting the process to the solution.

Bottom Line... *"Savance will save your business money."*

OrderSavant = Process and Profit Improvement

Key Features:

- Maintain your current ERP / legacy system
No need to invest additional capital expenditures to replace existing business systems.
- Visual Windows-style buttons
Point-click and pull-down menus. No need to memorize text commands and navigation strings.
- Rapid and efficient training
OrderSavant has been designed to bring inside, outside, and counter sales quickly up to speed.
- Fax, E-mail or export quotes.
You can fax or e-mail directly from the computer.
- Proactively sell and up-sell
Cross-reference and offer suggestions on certain inventory or accounts.
- Warning Manager.
Prior to printing or processing an order, the "Warning Manager" displays alarm messages regarding processes and variances above or below preset parameters (such as low margin).
- Cut, Copy, & Paste functionality
Data such as items, quantities, UPC's, and customer information can be shared between different Windows/MS Office applications such as Excel.
